

HQIC IS MY COMPASS

Because:

My passion is fueled by a strong desire to help improve the care and safety of our patients in all of the ways that I can help. HQIC's guidance has helped educate me as a new Quality professional to be more qualified to support the care behind the data we are reporting. Our advisor is an immense resource of knowledge and experience, and she supports our department by assisting us with all of the resources available through IHC to help us to help our staff in more efficient and effective ways.
