Medici

Turnkey, Cloud-Based Modules

Antimicrobial Use (AU)

- Measure appropriateness of prescribing
- Trend analysis for ordered, prescribed and administered antibiotics

Antimicrobial Resistance (AR)

- Create resistance profiling – antibiogram for hospital
- Typically used for empiric therapy

Patient Surveillance

- Prospective intervention: identify opportunities to change antibiotic therapy
- Patient data from integration with EHR

Medici® AUR

Medici

Hospital Antimicrobial Stewardship Program

Medici® AUR

- Antimicrobial consumption reporting
- NHSN AUR submission
- Resistance profiling (antibiograms)

Who We Serve

- Works with any EHR
- Works with hospital of any size
 - CAH
 - Independent Hospital
 - Health Systems

Medici® AUR
